

SANGFOR aCMP

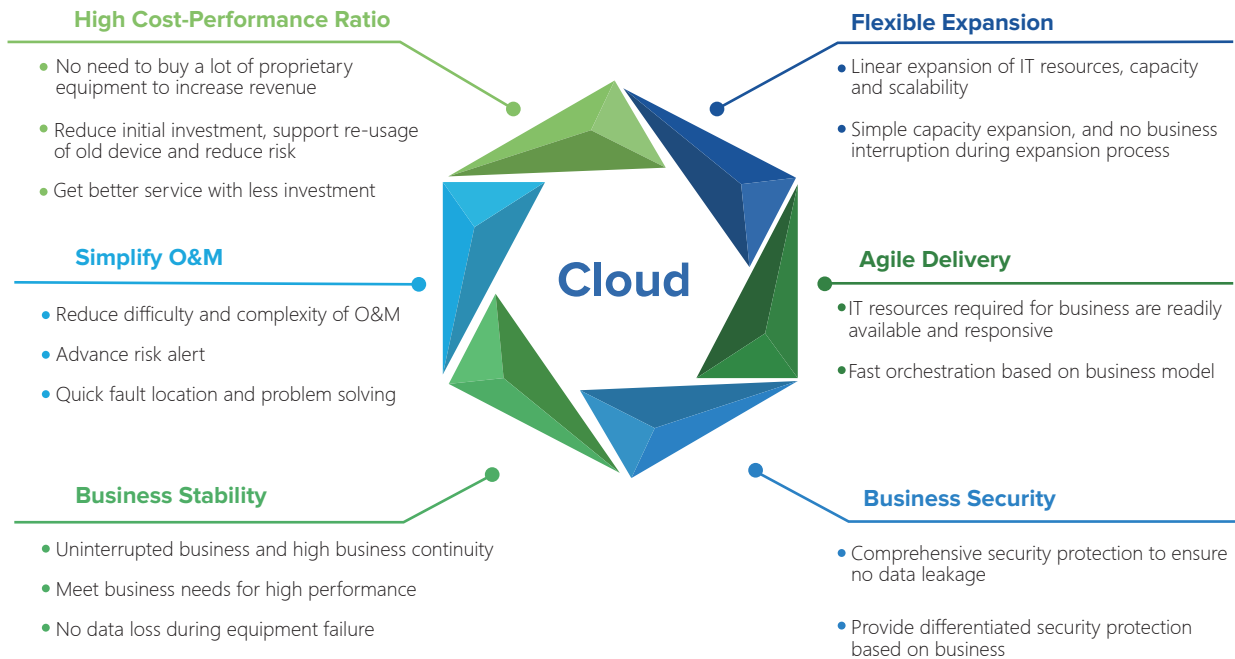

Take the leap to cloud with Sangfor aCMP on HCI

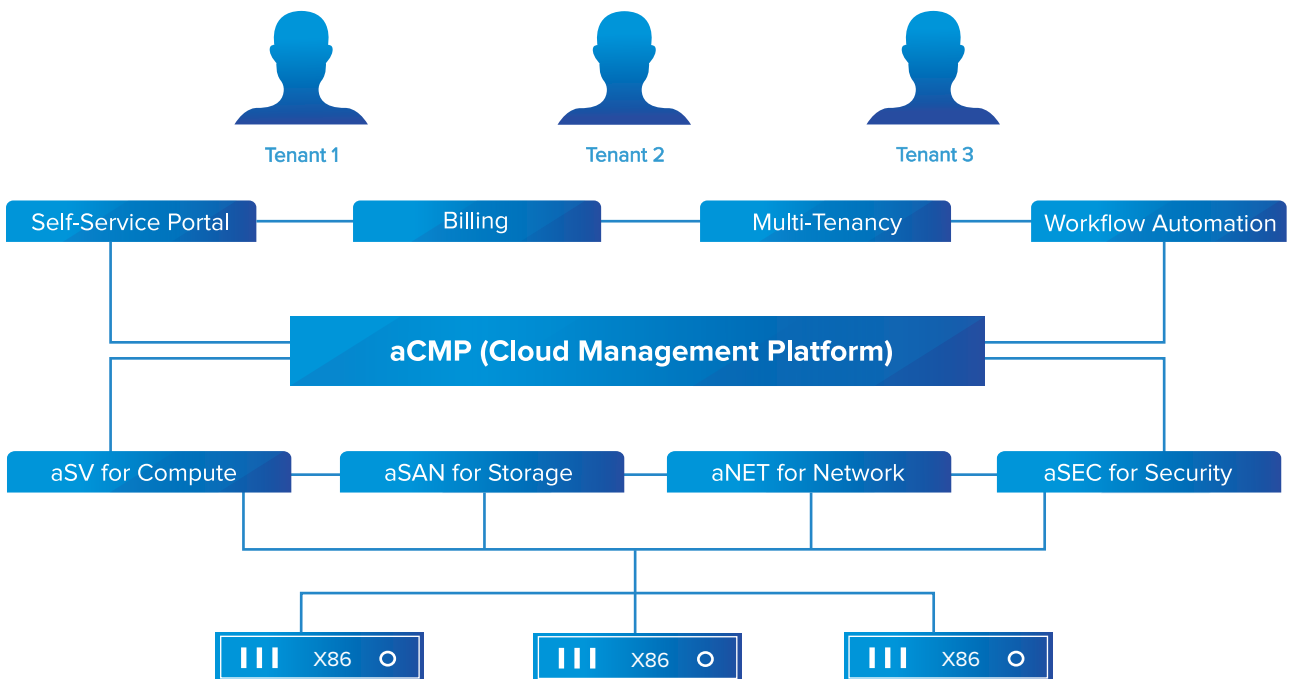

www.sangfor.com

The characteristics of cloud infrastructure

Sangfor aCMP, transforming HCI to aCloud

Features of Sangfor aCMP

Self-service portal

Respective portals for user and admin, all the operations such as resource application and workflow approval can be done on a web-based GUI

Multi-tenancy management

3 tiers of administration roles, every tenant includes tenant admin and tenant user, support tenant resource quota assignment, tenant's network is isolated to avoid security threats

Workflow approval

Admin is able to approve resource requests by users according to corresponding workflow process, support workflow customization.

Billing and metering

Resources consumed by each tenants and users can be billed and metered by pre-defined charge policy, billing reports can be exported with detailed consumption record

Multi-cluster management

HCI clusters across different sites can be managed by aCMP in a centralized way to simplify O&M of multiple clusters

Visualized management

Each tenant can create its own network topology with the widely acclaimed "what you draw is what you get", management of HCI is embedded into the management console of aCMP

Self-service portal

Unparalleled values for your business

1 stop cloud solution

Both virtualization and cloud management are developed and optimized by Sangfor, customers can enjoy a single vendor solution without support hassle

Massive TCO reduction

Based on the industry-leading HCI platform, aCMP vastly simplifies cloud infrastructure with only x86 servers and L2 switch, massively cutting capital and operational cost

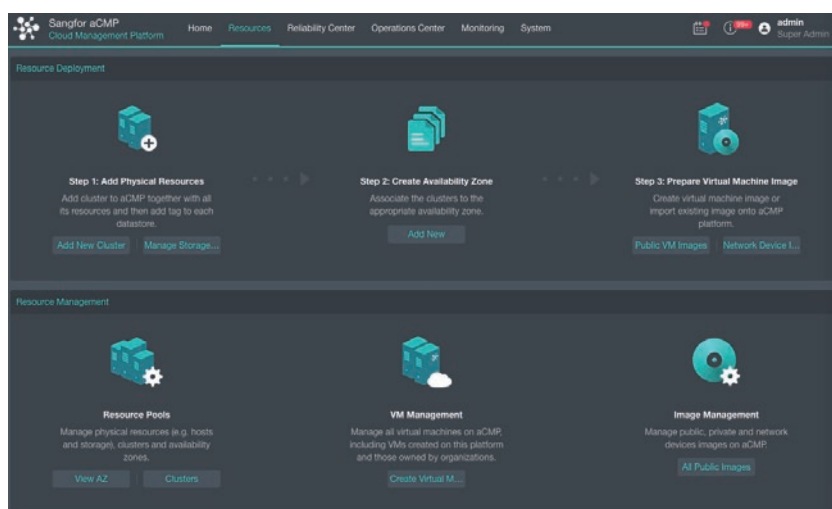

Rapid time to market

Orchestration and automation empowered by aCMP significantly reduce the time of resource provisioning, management and monitoring, enabling unprecedented time to value for business

Focus on your business innovation

aCMP elevates your focus on business instead of your infrastructure, it is business-oriented so that you can innovate more on business

aCMP is the cloud management platform developed by Sangfor, it can be deployed on Sangfor HCI to transform the HCI platform to a true private cloud. aCMP is license-controlled, please contact your local Sangfor sales representative for commercial information. To know more about aCMP deployment, please refer to aCloud 5.8.6 user manual.
