SANGFOR
NETWORK SECURE
NSF-1030A-I

Sangfor Network Secure (previously known as Sangfor NGAF) is the world's first next-generation firewall that combines the latest AI Technology, Cloud Threat Intelligence, NG-WAF, IoT Security, and SOC Lite.

Experience unrivaled protection, simplified management, and effortless operation with Sangfor Network Secure.

Visionary in 2022 Gartner® Magic Quadrant™ for Network Firewalls

Performance	NSF-1030A-I
Firewall Throughput [1,2]	2Gbps
Application Control Throughput (64K HTTP/Enterprise Mix) [1,3]	750Mbps/600Mbps
IPS Throughput (64K HTTP/Enterprise Mix) [1]	380Mbps/320Mbps
NGFW Throughput (64K HTTP/Enterprise Mix) [1,4]	380Mbps/320Mbps
Threat Prevention Throughput (64K HTTP/Enterprise Mix) [1,5]	300Mbps/250Mbps
Web Application Protection Throughput (64K HTTP/Enterprise Mix) [1,6]	N/A
IPsec VPN Throughput [1,7]	220Mbps
Max IPsec VPN Tunnels	100
Recommended Maximum SSL VPN Users	N/A
Concurrent Connections	800,000
New Connections	30,000
Virtual Domains (Recommended/Max)	1/1

Hardware Specifications	NSF-1030A-I
Form Factor	Desktop
RAM	4GB
Storage	64GB SSD
Power Supply Type	Single AC
Power Input	100-240V, 50/60Hz
Power Consumption (Average)	18W
Power Consumption (Max)	24W
Operating Temperature	0°C – 45°C
Humidity	5% - 90% non-condensing
System Weight	2.7kg
Length x Width x Height (mm)	175 x 275 x 44.5
Certificates	CE, FCC

Interface & IO	NSF-1030A-I
Hardware Bypass (Copper)	N/A
10/100/1000 Base-T	6 (Fixed onboard)
1G SFP	2 (Fixed onboard)
10G SFP+	N/A
40G QSFP+	N/A
Network Slots (In Use/Total)	N/A
Dedicated Management Interface	N/A

| Interface & IO	NSF-1030A-I
Optional Interface Card	N/A
Serial Port	1 x RJ45
USB Port	2

Remarks

1. All throughput performance data is measured under laboratory conditions. Actual performance may vary based on configuration and network environment.

2. Firewall Throughput is measured with 1518 Bytes UDP packets.

3. Application Control throughput is measured with Firewall and Application Control enabled.

4. NGFW Throughput is measured with Firewall, Application Control, Bandwidth Management, and IPS enabled.

5. Threat Prevention Throughput is measured with Firewall, Application Control, Bandwidth Management, IPS, and Anti-Virus enabled.

6. Web Application Protection Throughput is measured with Firewall, Application Control, Bandwidth Management, IPS, and WAF enabled.

7. IPsec VPN Throughput includes Sangfor-to-Sangfor device connection and Sangfor-to-3rd party device connection scenarios.

8. All Pictures shown are for illustration purpose only. Actual Product may vary.

SANGFOR
• Key Scenarios •

Headquarters

Branch Office
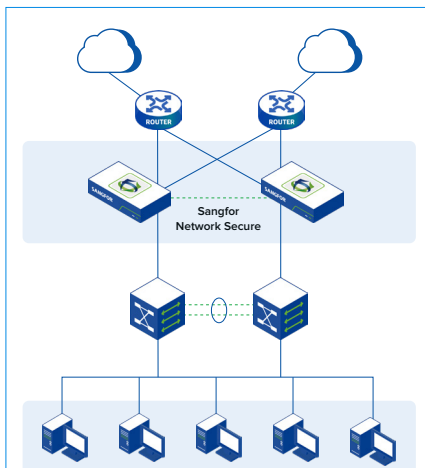

Network Protection

- ✓ AI, Threat Intelligence & WAF
- ✓ Complete asset & threats visibility
- ✓ Auto threat mitigation
- ✓ Avoid misconfigurations
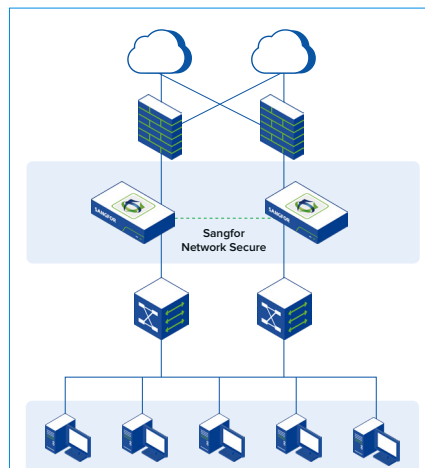

2nd-Tier Firewall

- ✓ Extra layer of protection
- ✓ Effortless deployment
- ✓ No configuration changes
- ✓ Built-in hardware bypass

Secure SD-WAN

- ✓ Boost network agility
- ✓ Guarantee business continuity
- ✓ Strengthen security control
- ✓ Reduce TCO

• Feature List •

Networking & Deployment

- Deployment Modes: Routed Mode (Layer 3), Transparent/Bridge Mode (Layer 2), Virtual Wire Mode, Bypass Mode, Hybrid Mode
- IPv6-Ready: IPv4, IPv6, or IPv4/IPv6 dual-stack deployment
- Interfaces: Physical, VLAN (802.1Q tagging & trunking), Sub-interface, Loopback
- PPPoE Support: Physical interfaces and sub-interfaces
- Interface Definition: Define interfaces as WAN, LAN, DMZ without hardware constraints
- Supports GRE and GRE tunneling
- Interface Aggregation: LACP Mode and Static Mode (Round Robin, Hash, and Active-Standby)
- Link Health Detection: ARP, DNS, Ping, BFD
- Jumbo Frame: Supported on physical interfaces
- Customizable network and security zones
- DHCP Features: DHCP, DHCPv6, DHCP & DHCPv6 relay, IP reservation (IPv4 & IPv6)
- DNS Capabilities: DNS proxy, DNS transparent proxy, DNS64, DDNS
- ARP Proxy
- Static routing, policy-based routing, multicast routes, reverse path forwarding, ECMP
- Policy Routing: By source/destination IP, ISP, country/region service, application type
- Link Load Balancing: Round robin, bandwidth ratio, weighted least traffic, priority link
- Protocols: RIPv1/v2, RIPNG, OSPFv2/v3, BGP/BGP4+
- Supports Route redistribution
- OSPF supports access list and route maps, graceful restart
- Supports route testing to verify the routing result
- Displays routing table on GUI
- NAT Features: SNAT, DNAT, Bidirectional NAT/PAT (Modes 1:1, 1:N, N:1, M:N), NAT64, NAT46, NAT66, DNS-mapping
- Application Layer Gateways (ALG): FTP, RTSP, SQLNET, PPTP, TFTP, H.323, SIP
- Availability Features: Active-Active, Active-Standby, Hardware Bypass

IPsec VPN

- Supports: Sangfor VPN, IPsec VPN
- Site-to-site IPsec VPN (static IP, dynamic IP, dynamic domain)
- IKEv1 and IKEv2
- Works in tunnel mode
- IPsec protocols: AH and ESP
- Supports main mode and aggressive mode
- Authentication methods: pre-shared key and certificate
- Local & peer ID: IP address, Domain String(FQDN), User String(USER_FQDN)
- DH Group & Perfect Forward Secrecy: group1(MODP1024), group2(-MODP768), group5(MODP1536), group14(MODP2048), group15(MODP3072), group16(MODP4096), group17(MODP6144), group18(MODP8192), group19(ECP256), group20(ECP384), group21(ECP512), group22(-MODP1024_160), group23(MODP2048_224), group24(MODP2048_256), group25(ECP192), group26(ECP224), group27(ECP224_BP), group28(ECP256_BP), group29(ECP384_BP), group30(ECP512_BP).
- IPsec encryption algorithms: DES, 3DES, AES/AES128, AES192, AES256, Sangfor_DES
- IPsec authentication algorithms: MD5, SHA1, SHA256, SHA384, SHA512
- NAT-T, DPD
- Supports setup expiration time of IPsec VPN tunnels
- Supports VPN tunnel auto rebuild during heartbeat failure or HA failover
- VPN tunnel status monitoring, including traffic, latency, packet loss, etc.
- Configuration wizard for Sangfor VPN or IPsec VPN

SSL Decryption

- SSL/TLS inspection: Outbound traffic to the Internet and inbound traffic to application servers
- TLS 1.3 decryption

Make Your Digital Transformation Simpler and Secure

SANGFOR

Feature List

SD-WAN & Central Management

- Dynamic Path Selection: Based on custom SLAs (jitter, latency, packet loss), bandwidth, application type
- Application categorization by type to meet different SLA requirements
- SOFAST Engine: Link optimization in high packet loss environments
- SD-WAN tunnel failover and link failover
- Zero-touch provisioning via email template
- Map view of device location
- Centralized management with Sangfor Central Manager
- Centralized monitoring of device status, CPU/RAM/disk usage, traffic
- Centralized remote control of devices
- Centralized security policy distribution
- Centralized VPN deployment and configuration

Bandwidth Management

- Manage bandwidth by application, user/group, IP address, schedule, country/region, sub-interface, VLAN interface, VPN tunnel
- Bandwidth Control: Bandwidth guarantee, bandwidth limit, upload & download speed, speed for single IPs

Access Control & Authentication

- Stateful Packet Inspection (Stateful Firewall)
- Deep Packet Inspection (DPI): Identifies applications to allow/deny access
- Build-in Application Signature Database, including P2P, IM, gaming, video streaming, email, proxy tools, etc.
- "From top to bottom, first match basis" method
- Access control based on source/destination IP, source/destination zone, source port, FQDN, MAC, User, service, applications, schedule, etc.
- Supports persistent connections
- Supports matching count for access control policies
- Policy optimizer: One-click to identify abnormalities in access control policies, including redundancy, duplication, and conflicts
- Automatically records the access control policy lifecycle
- Geolocation blocking: Allow/deny access from certain countries/regions
- Connection control based on source IP, destination IP, bidirectional IP
- User authentication: Captive portal, MAC/IP address binding, or Single Sign-On (SSO)
- Authentication with LDAP, RADIUS, POP3. Supports user imports via CSV file
- Single-Sign-On (SSO) with Microsoft AD, RADIUS, Web, etc.
- HTML-based customizable captive portal

IoT Security

- Detect IoT devices across the network through proactive scans and traffic learning
- Detected IoT devices are presented as an asset list
- Support Spoofed Access detection & control via IP, MAC, and Device Type
- Dedicate IoT IPS signature database

ARP, DoS/DDoS Attack Protection

- DoS/DDoS attack protection for both the network and the device itself
- SYN flood, ICMP flood, ICMPv6 flood, UDP flood, DNS flood, ARP flood prevention
- IP scan and port scan prevention
- Packet-based attack prevention, e.g., TearDrop Attack, IP fragment, LAND attack, WinNuke attack, Smurf attack, Ping of Death, Unknown protocol
- Bad IP option, Bad TCP option prevention
- ARP Spoofing Protection

Content Security

- URL filtering with a built-in URL signature database
- Supports customized URL signatures
- File filtering in both upload and download directions. Supported file types include pictures, text files, compressed files, and executables
- Gateway malware inspection: Cloud-based Sangfor Neural-X (threat intelligence, sandbox) and on-premises Sangfor Engine Zero (AI malware inspection engine). Able to prevent known and unknown threats
- Malware inspection supports protocols like HTTP, HTTPS, FTP, SMB, SMTP, POP3, IMAP
- Malware inspection supports file types including movies, music, image, text, compressed files (up to 16 layers), executables, documents, scripts
- Remove malware from detected malicious files
- Whitelist based on MD5 and URL
- In-depth inspection of email body and attachments
- Inserts warning messages into email subjects to caution users against opening malicious emails

APT Protection & Intrusion Prevention System (IPS)

- Malicious Domain & URL Detection
- Remote Access Trojan (RAT) Detection
- Suspicious Traffic Detection: Discover abnormal behavior on standard ports
- Vulnerability Exploit Protection: Protect against vulnerability exploits targeting systems, applications, middleware, databases, explorer, Telnet, DNS, and more
- Brute-Force Attacks: Protection profiles for SSH, Telnet, RDP, NTLM, FTP, etc.
- Botnet Detection: Detect botnet client communication, include DNS tunneling, ICMP tunneling, HTTP tunneling etc.
- Correlate with Sangfor Endpoint Secure to detect hidden botnet activity
- Cloud-based analysis engine for enhanced detect
- Dedicated protection profiles for client & server scenarios
- Supports custom IPS rules

Feature List

SOC Lite

- Proactive asset detection and guidance for fixing potential risks

- Business System & Client Threats Dashboard: Monitor and manage threats to business systems and clients, including severity levels, threat types, kill-chain steps, top security events

- Ransomware Protection Dashboard: Detect and manage ransomware-related risks such as weak passwords, risky ports, etc. Helps administrators create ransomware protection policies

- Account Security Dashboard: Detect account-related threats, including weak passwords, abnormal login activity, brute-force attacks, compromised accounts

- Whitelist & Blacklist

- Cloud Deception: Utilize cloud resources to deploy decoys to confuse attackers, track malicious behaviors, locate and block the source of the threat

Certifications

- CE, FCC

- ICSA Firewall, Gartner Magic Quadrant, CyberRatings

Integration

- Sangfor Neural-X: Latest threat intelligence, cloud-based URL/App classifications, etc.

- Sangfor Endpoint Secure: Share intelligence and locate and mitigate malicious processes with quick/full scan and one-click kill

- Sangfor Cyber Command: Security log analysis

- Sangfor Platform-X: Centralized management

- Restful APIs available to integrate with third-party SIEM, SOC, etc.

Logging & Reporting

- Built-in log and report center available by default for all hardware models

- Records logs to local disk including access control logs, session logs, traffic audit logs, user authentication logs admin operation logs, local ACL logs.

- Traffic/session monitoring by device, application, IP, interface

- Displays traffic rankings by user/IP, group, application type & application category.

- Options for daily, weekly, or monthly security report subscriptions

- Supports security reports in PDF format

- Supports syslog in Common Event Format

- Supports sending syslog to multiple target servers

Management

- Support manage via WebUI, SSH, CLI, serial port etc.

- WebUI supports TLS1.0, TLS1.1, TLS1.2, TLS1.3

- Supports role-based authorization for admin users. Default roles include security admin, system admin, and audit admin

- Admin user supports local password, TACACS server, and RADIUS server

- Automatic or manual configurations backup

- Backup configuration file to FTP, TFTP & SFTP by schedule

- Time setting supports synchronization with local PC and NTP servers

- Firmware version rollback

- SNMP v1/v2c/v3, SNMP trap

- Email alerts for hardware abnormality, resource usage, security event, HA status, etc.

- Troubleshooting via WebUI; Identify packet drop reasons by policy, interface, etc.

Remarks

* All the feature above is based on Network Secure Firmware version 8.0.85 and higher.

SANGFOR

• Ordering Guide •

Sangfor Network Secure Hardware

SKU	Description
NSF1030A	NSF-1030A-I, hardware appliance. 6 x GE RJ45, 2 x SFP Interface, 64GB SSD. Single AC power supply.

Sangfor Network Secure Bundle Subscription

SKU	Description
ESS-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Essential Bundle (Site-to-Site IPsec VPN, Stateful Firewall, Bandwidth Management, URL Filtering, Application Control, IPS, Botnet Prevention, Email Security, SOC Lite, Basic Security Reporter)
PM-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Premium Bundle(Site-to-Site IPsec VPN, Stateful Firewall, Bandwidth Management, URL Filtering, Application Control, IPS, Botnet Prevention, Email Security, SOC Lite, Basic Security Reporter, Engine Zero, Neural-X)
ULT-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Ultimate Bundle including Premium Bundle (Site-to-Site IPsec VPN, Stateful Firewall, Bandwidth Management, URL Filtering, Application Control, IPS, Botnet Prevention, Email Security, SOC Lite, Basic Security Reporter, Engine Zero, Neural-X) & Basic device management & Complimentary 30 units of Endpoint Secure Protect Agents with one Endpoint Secure manager.
SDWE-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Secure SD-WAN Essential bundle (Site-to-Site IPsec VPN, Stateful Firewall, Bandwidth Management, URL Filtering, Application Control, IPS, Botnet Prevention, Email Security, SOC Lite, Basic Security Reporter, SD-WAN, 1 * Central management branch access license).
SDWP-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Secure SD-WAN Premium bundle (Site-to-Site IPsec VPN, Stateful Firewall, Bandwidth Management, URL Filtering, Application Control, IPS, Botnet Prevention, Email Security, SOC Lite, Basic Security Reporter, Engine Zero, Neural-X, SD-WAN, 1 * Central management branch access license).

Sangfor Network Secure A-La-Carte Subscription

SKU	Description
FNX-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Neural-X License, Threat Intelligence & Analytics, Unknown Threat & Advanced Threat Defense, Value-Added Cloud Service.
FEZ-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Engine Zero License, AI powered Malware Detection, Anti-malware, Anti-virus.
SDWL-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Secure SD-WAN License, support SD-WAN path Selection, Sangfor SOFAST packet loss optimziation engine and 1 * central management branch access(BBCAL-1D).
IOTL-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, IoT Security License, supporting IoT/OT Device Discovery, Access Control & Security Protection.

Sangfor Network Secure Hardware & Software Service

SKU	Description
SUS-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Software Upgrade Services.
TSS-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, 24*7 Technical Support Services.
HRTF-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Return to Factory (5 Business days ship after receipt) Hardware Service.
HSDS-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Network Secure, Same Day Shipment Hardware Service.
HNBD-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, Network Secure, Next Business day Delivery Hardware Service.
H244G-1030A-1Y/2Y/3Y/5Y	NSF-1030A-I, 24x7x4 Delivery Hardware Service.
